## Map 3 – Stoneville

This map is of Stoneville. Stoneville has lots of enormous pieces of land and only put one house on it. This is a poor use of the space. One of the pieces land in the area I coloured could easily fit five Duncraig homes on it, instead of one or two. I coloured in the blocks along Stoneleigh Road, Riley Road, and Beelara Heights. My grandparents live on this path, but they have put two houses on their block (see picture). When comparing this map with the other two maps this seems like a lot of land for only one to two families to live on.

## Solutions

Some solutions are that instead of expanding the metro area we should pack more people into the area we currently have by building lots of apartments and units. An example is Paris and Tokyo where they have built upwards with lots of apartment blocks.
